

4156 Final Demo

Team name: Falcon

Team members:

Weiham Chen wc2681

Zeyu Zhu zz2676

Xiaobin Lin xl2894

Yuyao Zhong yz3618

part 1: The date and time at which you already completed this demo, and briefly describe any challenges that arose during the demo.

Completion Time: Dec.10.2020

Challenges:

(1) Since we have limited time for our demo, we have to pace ourselves to cover all major points.

(2) We have to anticipate errors that would occur during the demo. We did encounter a double-click error during our demo. But we were able to explain the logic behind it smoothly.

part 2: A link to the github repository where your entire codebase resides. Tag the revisions that were shown in the demo.

<https://github.com/YuyaoZhong/4156-team-project/tree/master/>

Tag: <https://github.com/YuyaoZhong/4156-team-project/releases/tag/final-demo-mvp>

part 3: A link to the folder in your repository that includes all your prose assignment submissions for this course.

<https://github.com/YuyaoZhong/4156-team-project/tree/master/proposal>

Please plan (human/manual script) your demo in advance, and debug until it works smoothly. The demo itself only needs to be 5-10 minutes, but schedule enough time for pre-demo setup and post-demo discussion with your IA mentor, plus about 5 minutes for your mentor to "drive".

Prior to your final demo, update your github repository folder containing your team assignment submissions. Make sure it includes your preliminary proposal, revised proposal, first iteration, initial demo submission, and second iteration. Then, after completion of your final demo but before submitting this report, add this final demo report to your repository folder.
